

PREPARING FOR NIH'S SINGLE IRB REVIEW REQUIREMENT

As of January 2018*, all competing National Institutes of Health (NIH) grant applications for multi-site research require a plan for use of a single IRB. This training will review NIH's new policy for single IRB review and its implications; discuss how JHU will address the single IRB review requirement; provide advice on how to continue to provide a safe, ethical research environment while participating in single IRB studies and offer practical tips for grant applications, including budget development. Investigators and study team members preparing grant applications subject to these new requirements are encouraged to attend.

<http://lms14.learnshare.com/l.aspx?CID=89&A=2&T=698882>

**January 25, 2018 is the currently proposed implementation deadline for NIH's Policy on single IRB review.*

What type of Research Studies does the new NIH policy apply to?

What is the SMART IRB Reliance Agreement?

How will this new rule affect the grant application process?
