Johns Hopkins Breast Cancer Conference

A Multidisciplinary Perspective

The 10th Biennial

Description

Since our last conference, the diagnosis, treatment and overall care needs of breast cancer patients have become more complex. This is due to innovative improvements in therapies, better screening processes, and multidisciplinary care models developing across the U.S.. The indications for axillary node dissection continue to change. Immunotherapy with immune checkpoint blockade is achieving startling results in some patients. There are more options for molecular profiling of tumors, as well as more choices about systemic therapies and radiation therapy. There are more and more long term survivors who require intelligent management by primary care providers to maintain a high quality of life. Come listen, learn and actively participate in discussions regarding these topics and more.

Who Should Attend

This activity is intended for radiologists, pathologists, surgeons, medical and radiation oncologists, nurses, nurse practitioners, physician assistants and other professionals involved in prevention, screening, diagnosis and management of breast cancer.

Objectives

After attending this activity, the participant will demonstrate the ability to:

- Describe new data and discuss ongoing controversies in the management of breast cancer.
- Apply evolving data to individualizing breast cancer management.
- Identify areas of controversy in neoadjuvant treatment of breast cancer.

ACCREDITATION STATEMENT

The Johns Hopkins University School of Medicine is accredited by the Accreditation Council for Continuing Medical Education (ACCME) to provide continuing medical education for physicians.

ACKNOWLEDGEMENT

Applications for commercial support from health care related industries are pending. A complete list of contributors will be provided in the syllabus. Please note that commercial support received is solely for the educational component of the activity and will not be used to provide food and beverage.

Please note: The Physician Payments Sunshine Act was enacted by Congress to increase public awareness of financial relationships between drug and medical device manufacturers and physicians. In compliance with the requirements of this Act, the commercial supporter/s of this activity may require the Johns Hopkins School of Medicine to report certain professional information (such as name, address, National Provider Identifier (NPI), and State License number) of physician attendees who receive complimentary food and beverage in conjunction with a CME activity. The commercial supporter is required to submit the collected data to the Centers for Medicare and Medicaid Services which will then publish the data on its website.
