Poster Call for Advancing Research in the Digital Age

A conference presented by the Research Participant Community Partnership Core of the Johns Hopkins Institute for Clinical Translational Research

1 DAY CONFERENCE
Tuesday, February 27, 2018

Turner Concourse
720 Rutland Avenue, Baltimore, MD 21205

With the digital revolution in consenting, recruiting, and managing participants in research there are many opportunities and challenges for practice and policy in research at Johns Hopkins. This year's conference is focused on building institutional knowledge around research consenting, recruiting, and data collection in the informatics age. The 1-day conference program is designed for an audience of researchers, coordinators, and fellows. The goal of the program is to help JH researchers identify digital technologies available here at Hopkins and how to utilize these tools in human subject's research.

CALL FOR ABSTRACTS
Due February 10, 2018

The poster session will showcase work being done utilizing digital technologies. We are seeking abstracts from faculty, fellows, students, and staff members who would like to present posters. The poster session will increase awareness of digital technologies and highlight recent innovations in implementation of various digital tools into the research process. Posters can be original research, case studies, best practices, utilization of innovative digital tools, and or highlight challenges encountered with digital technology in clinical research.
