

Role of the Office:

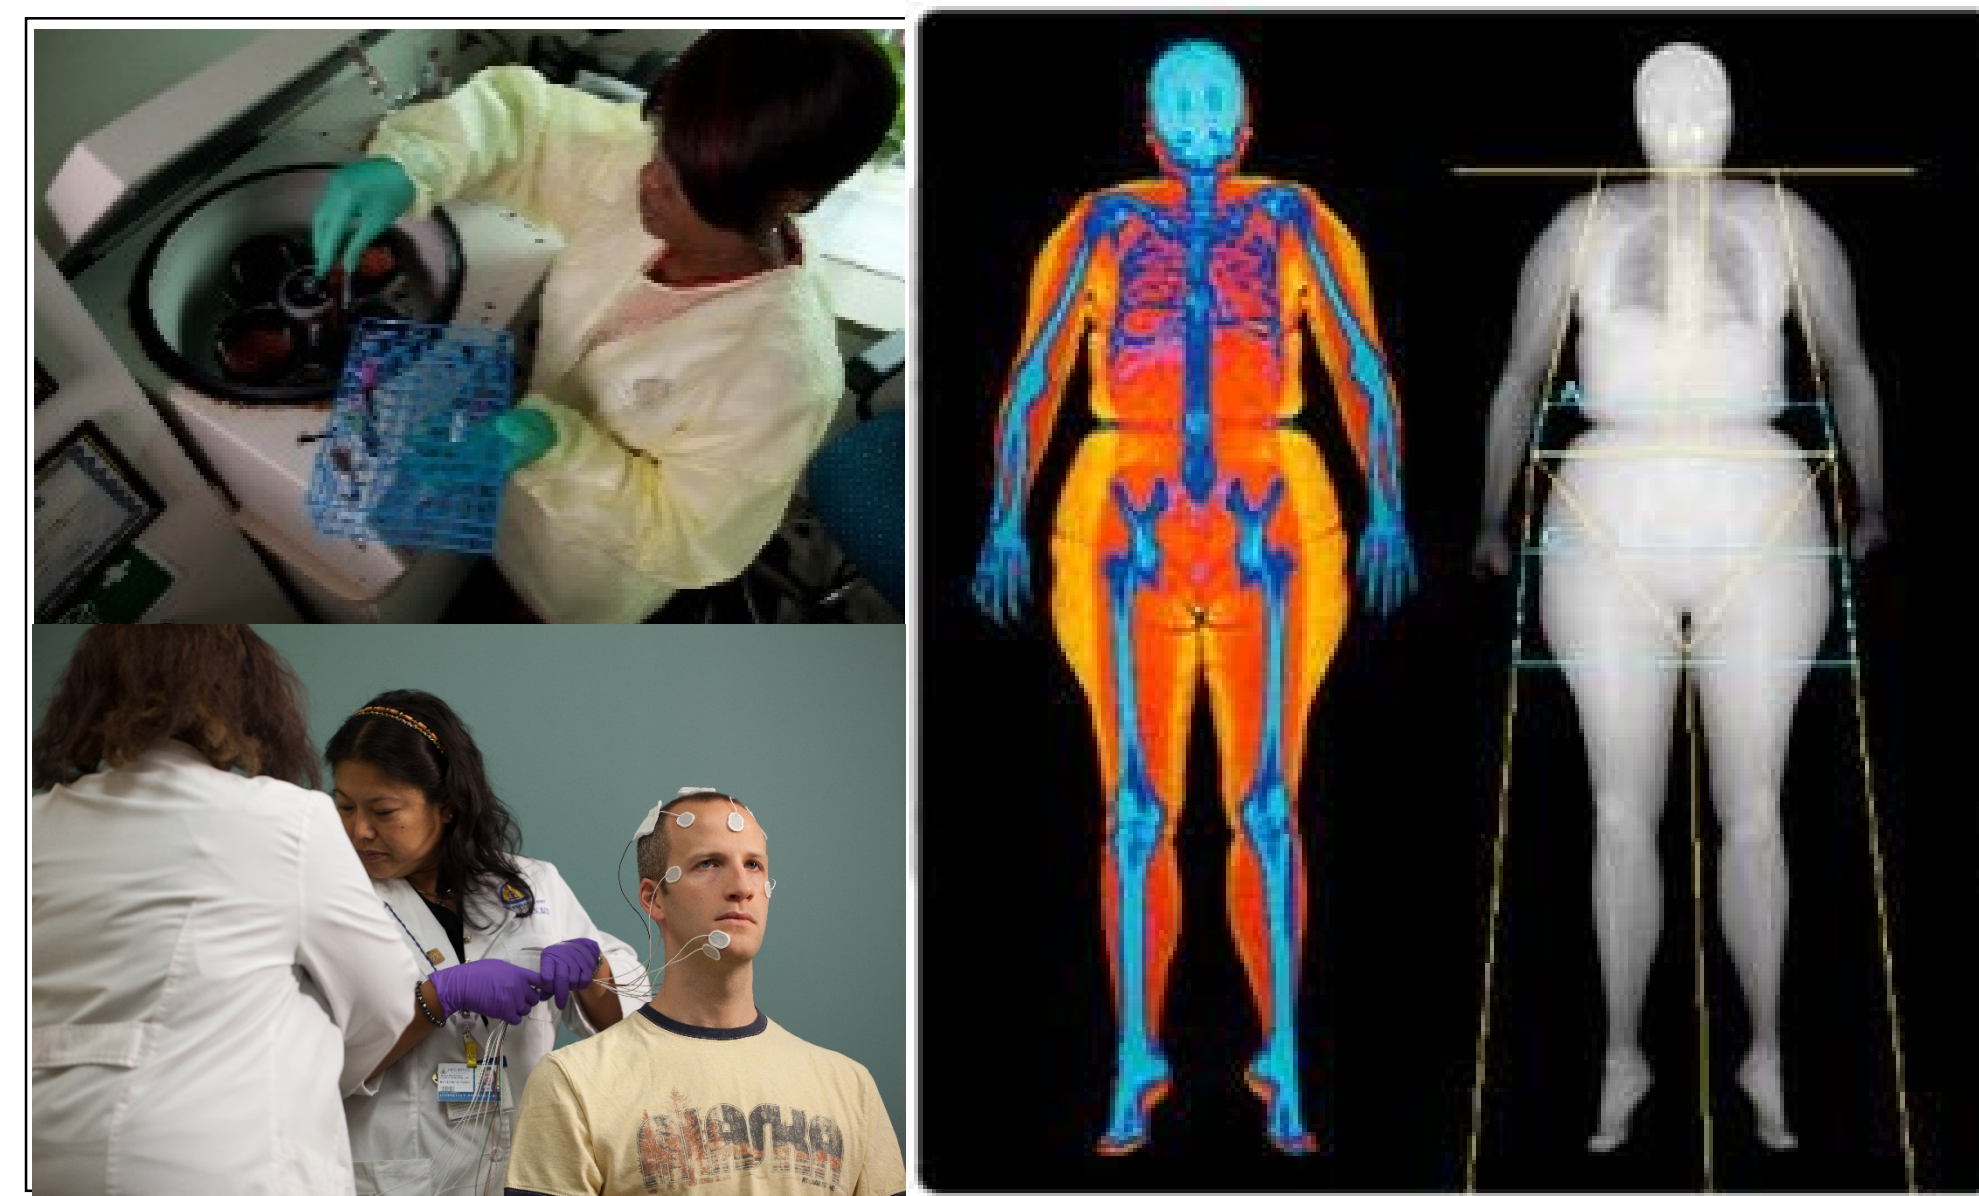

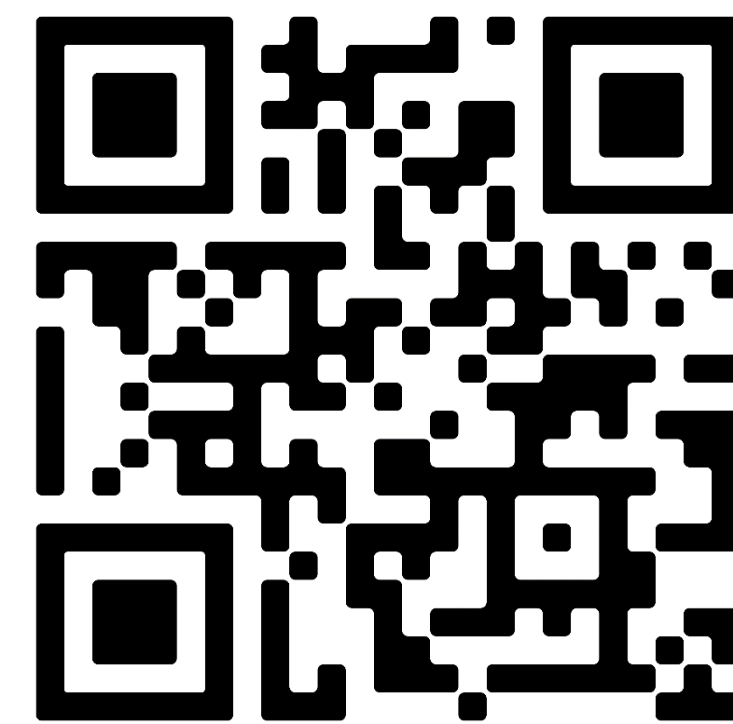

- To provide space and resources (specialized personnel and equipment) that allow investigators to conduct innovative, high quality, safe, efficient, and cost-effective clinical and translational research across the age spectrum.
- The JH CRUs are a coordinated network of 4 facilities across the East Baltimore and Bayview campuses.

BOOST & PROPEL Awards

- New clinical research grants that award CRU resources to investigators, based on merit and willingness to be monitored for study-specific milestones.
- The goal of is to accelerate protocols to produce efficient, high quality, safe research and to disseminate the results.
- **BOOST** awards are for junior investigators to generate pilot data or to supplement a K project. **PROPEL** awards are intended for established investigators who are performing early stage clinical trials, deep phenotyping studies, or studies that address Maryland health priorities.
- Request for applications accepted quarterly
