

Policy Implementation Science Training

The Global Center for Implementation Science is excited to announce the 3rd annual policy implementation science training designed for faculty and trainees who want to learn more about policy implementation science research.

TRAINING OBJECTIVES

Understand relevant theories and frameworks, study designs, measures, and concepts related to policy implementation science and apply this knowledge to:

- Develop a policy-focused implementation science grant.
- Integrate a policy component or aim into a non-policy-focused implementation science grant or project or vice versa.
