Request for Applications (RFA)
Post-acute COVID-19 Syndrome Discovery Fund (PAC19SDF)

In continuing response to the COVID-19 pandemic, the Johns Hopkins University, through a gift from the Bentivoglio Family Foundation, is funding grants to support clinical or translational projects focused on post-acute COVID-19 Syndrome. Solicitation, review and awarding of grants is managed by staff of the Division of Infectious Diseases.

Description
To provide funds for clinical or translational research focused on understanding the incidence and long-term prognosis of late sequelae in persons with mild, moderate, and severe COVID-19 disease, identify the underlying pathology, and develop evidence-based treatments.

Details
• Maximum three project will be funded, up to $50,000 USD each.
• The grant period is 12 months, with a possible 12-month no-cost time extension upon review.
• All Johns Hopkins University full-time faculty members with a terminal degree are encouraged to apply.
• Proposals should be clinical or translational human research. Basic science or laboratory-based research or animal study approaches will only be considered if clearly a part of a clinical or translational research project.
• All interested applicants are strongly encouraged to review the PAC19SDF Application Guidelines 2021 before preparing a grant application.
• Further information on how to apply and supporting documents may be found online at PAC19SDF
