
ICTR TEAM SCIENCE AWARD

CALL FOR NOMINATIONS 2021

ICTR TEAM SCIENCE AWARD AT A GLANCE				
WHO	WHAT	HOW	WHERE	WHEN
Johns Hopkins interdisciplinary teams working toward a common scientific goal	An award to recognize success in creating a culture of teamwork that comes with: -\$2,000 to be used for team functions, -A Coffee break package for the team, & -Being featured in a “best practices in team science” event.	By submitting an application including the details outlined below	Application Submission Form	Submit by 11:59 pm on Friday, June 19, 2021

WHAT IS IT?

The Institute for Clinical and Translational Research is requesting nominations for the first-ever ICTR Team Science Award!

While many awards still go to individuals, advances in translational research are increasingly dependent on teams of individuals with different perspectives and skills working collaboratively towards a common goal. The concept of Team Science answers the question, “How do groups, particularly interdisciplinary groups, move through a process together?” Although seemingly simple, the field that studies the Science of Team Science has demonstrated that successfully conducting science in teams can be anything but. Thus, the goal of this award is to recognize the great work Johns Hopkins researchers have been doing as interdisciplinary teams and to highlight best practices and share lessons learned in Team Science. We expect this will be an annual award.

WHO CAN ENTER?

Any person within Johns Hopkins who is part of a Team Science biomedical research project is eligible to submit an application on behalf of a team. A Team Science project is defined as any group of interdisciplinary researchers working collaboratively toward a specific scientific goal. Interdisciplinary research can be defined as either cross-school collaborations (i.e., Medicine, Public Health, Nursing, Engineering, Arts & Sciences, Education, or Business), or as collaborations across different multiple department or fields of study. (See the [National Cancer Institute’s Collaboration and Team Science Field Guide for more information on Team Science.](#))

Entries may be submitted by the PI, a participating researcher, a community partner, a staff member, or any other team member. However, we ask that, in the spirit of collaboration, you confer with your team members so that only one application is received from each team. We also encourage teams to

incorporate the experience of more than one team member in the application. The team must include at least three members, led or co-led by a Johns Hopkins researcher, and have worked together on more than one research protocol.

So, if you are part of a interdisciplinary research team that has worked to accomplish challenging high impact science, we want to hear from you!

HOW DO WE WIN?

To win, you must enter. To enter, you must submit an application form at <https://redcap.link/TeamScience> by **June 19, 2021 at 11:59 pm**.

Here is what we want to know:

- 1) **Your Team.** What is your team's name? Who is on your team and what are their roles and what is their position at Johns Hopkins or another institution?
- 2) **Your team's back story.** Please share a description of the scientific goal for your multidisciplinary team. How did the team first come together? What have been the accomplishments to date for the team in science (e.g. what are the publications you're most proud of)? Be sure to highlight: the importance of the team's work, your innovation, and the impact on the lives of the patients and communities we serve. (5000 words max!)
- 3) **Lessons learned.** A description of what the team has learned about how to support each other effectively, including how you may have responded to setbacks or barriers that any team will face. (500 words max!)

The deadline to submit is June 19, 2021, 11:59 PM EST.

Entries will be judged based on:

- 1) Interdisciplinary composition of your team;
- 2) Success of collaboration across disciplines (e.g., ability to overcome challenges of working in a team);
- 3) Originality/Creativity/Innovation of your project,
- 4) Impact of the team's work; and
- 5) Advancement in the practice of team science (e.g., novel methods of collaboration).

We will be picking three winners. Chosen winners will be notified via email by July 19, 2021.

WHAT DO WE WIN?

Three teams within the Johns Hopkins system will be selected to receive the ICTR Team Science Award. In addition to self-satisfaction and external validation, these three teams will:

- 1) Celebrate with a "coffee break" package from the Bakery at NE Market;

- 2) Receive a prize of either \$2,000 to be used for team functions or a gift in-kind of ICTR services¹ (CCDA, CRU, REDCap, or OpenSpecimen, Research Studio);
- 3) Be featured at an ICTR Team Science event in which they will share their success and describe how they overcame challenges; and
- 4) Bragging rights for a year.

STILL HAVE QUESTIONS?

If, after thoroughly reading this document and discussing it among your team members, you still have questions, please email them to ICTRTeamScience@jh.edu by June 4, 2021.

¹ Teams will be provided with a project-specific consultation by the ICTR Navigators to help identify how the ICTR can best support their research.
