derived: enroll_info

Contains details about patient enrollments in research studies, including status, and enrollment start and end dates. NOTE: the Clinical Research Management System (CRMS) is the system of record for study enrollment, and an interface between the two systems refreshes patient data multiple times a day. For more information, see ht tps://ictr.johnshopkins.edu/programs_resources/programs-resources/i2c/clinical-research-management-system-cr ms/.

Variable	Type	Description
enroll_cmt_note_id	varchar(254)	Unique identifier for the note associated with the enrollment record
enroll_end_dt	timestamp	End date of the patient's enrollment in the study.
enroll_id	decimal(18,0)	The unique identifier for the patient's enrollment record
enroll_start_dt	timestamp	Start date of the patient's enrollment in the study
enroll_status	varchar(50)	Enrollment status for patients in a study. Statuses include Enrolled, Candidate, Consented, Withdrawn, Off Study, and more.
enroll_status_c	int	Unique identifier for the enrollment status
irb_approval_num	varchar(30)	The Institutional Review Board (IRB) approval number for the study
last_mod_dttm	timestamp	The date/time that the enrollment information was last modified
last_mod_source	varchar(254)	The method of the last modification to enrollment record. Methods include Interface, Import, MyChart, Research Studies Activity, In Basket, and more.
last_mod_source_c	int	Code representing the method of the last modification to enrollment record
last_mod_user_id	varchar(18)	User who last modified the enrollment information
myc_viewed_utc_dttm	timestamp	The date and time that a patient first viewed this enrollment as a MyChart recruitment request.
pat_id	varchar(18)	Unique patient identifier
pi_id	varchar(18)	Unique identifier for the principal investigator for the research study
principal_investigator	varchar(200)	Name of the principal investigator for the research study
record_creation_dt	timestamp	The date the enrollment record was created
research_name	varchar(255)	The name of the research study (IRB study title)
research_study_id	varchar(18)	Unique identifier of the research study
rsh_myc_status	varchar(254)	The status of the patient's enrollment for the MyChart recruitment workflow. Statuses include Waiting for Provider Approval, Provider Declined, Waiting for Patient Response, Patient Responded, and Retracted.

Variable	Type	Description
rsh_myc_status_c	int	Code representing the status of the patient's enrollment for the MyChart recruitment workflow
study_alias	varchar(30)	Patient alias for the study enrollment. In JHM's instance of Epic, this field is populated with the Enroll_ID.
study_code	varchar(255)	External ID for research study or client record. This code will appear on research study charges.
study_create_date	timestamp	The date that the study was created
study_status	varchar(50)	Status of the research study (Active, Inactive, Deleted, Hidden, etc.)
study_update_time	timestamp	Date/time of the last update to the research study record
