

## derived: epic\_patient

Information about the patient such as patient demographics (e.g. name, gender, race, address) and institution-specific medical record numbers for the patient.

Variable	Type	Description
activestudycnt	int	Indicates how many active studies the patient is currently participating in (those known to CRMS)
address1	varchar(50)	Patient's mailing address - line 1
address2	varchar(50)	Patient's mailing address - Line 2
birth_date	timestamp	Patient date of birth
bmcmrn	varchar(100)	Patient's recorded Bayview MRN
city	varchar(50)	Patient's mailing address city
country	varchar(100)	Patient's mailing address country
county	varchar(100)	Patient's mailing address county
death_date	timestamp	Patient's date of death
email_address	varchar(255)	Patient's email address
emrn	varchar(100)	Patient's Epic MRN (Enterprise ID)
ethnic_group	varchar(50)	Patient's ethnicity - Hispanic or Not Hispanic
first_contact	timestamp	Date/time of the first patient encounter, whether in-person or not
first_race	varchar(50)	Patient's first selected race - the race that is listed as the first race entered when collecting race for patient FOR THE ENCOUNTER
firstname	varchar(200)	Patient's first name
gender	varchar(50)	Patient's legal gender - female, male, unknown
genderabbr	varchar(10)	Legal gender abbreviation - F, M, U
hcgmrn	varchar(100)	Howard County General MRN
home_phone	varchar(192)	Patient's home phone
inactivestudycnt	int	Count of the number of inactive studies the patient has participated in (those known to CRMS)
jhhmrn	varchar(100)	JHH MRN
language	varchar(100)	Patient's preferred language
last_contact	timestamp	Date/time of the patient's last encounter (as of the database's refresh date)
lastname	varchar(200)	Patient's last name

Variable	Type	Description
marital_status	varchar(100)	Patient's marital status
middlename	varchar(200)	Patient's middle name
namesuffix	varchar(10)	Patient's name suffix
nametitle	varchar(50)	Patient's title (Mr., Mrs. Ms.)
next_contact	timestamp	Date/time of the next scheduled contact (e.g., future appointment, future surgery, etc.)
pat_id	varchar(18)	Unique patient identifier (Epic generated)
pat_name	varchar(200)	Patient's full name
pat_status	varchar(50)	Patient status (e.g., Alive, Deceased, Unknown)
preenrolledstudycnt	int	Count of the number of studies for this patient that is in the Candidate status in CRMS
racea	varchar(1)	Patient race - Asian
raceb	varchar(1)	Patient race - Black/African American
racedec	varchar(1)	Patient race - Declined to Answer
raceh	varchar(1)	Patient race - Hispanic
racei	varchar(1)	Patient race - American Indian or Alaska Native
raceo	varchar(1)	Patient race - Other
racep	varchar(1)	Patient race - Native Hawaiian or Other Pacific Islander
racerf	varchar(1)	Patient race - Patient Refused
racetwo	varchar(1)	Patient race - Two or More Races
raceu	varchar(1)	Patient race - Unknown
racew	varchar(1)	Patient race - White or Caucasian
religion	varchar(100)	Patient's religion
restricted_yn	varchar(1)	If this column contains the value "Y", access to the patient's records is limited to authorized personnel only. If this column contains the value "N", access to the patient's records is not limited. If this column is null, then the patient's records have not been expressly marked as Restricted through clinical system's registration window.
shmrn	varchar(100)	Suburban Hospital MRN
smhmrn	varchar(100)	Sibley Memorial Hospital MRN
stateabbr	varchar(10)	Two character state or province abbreviation
statename	varchar(100)	Full name of the patient's state or province
work_phone	varchar(50)	The phone number of the patient that was designated as the

Variable	Type	Description
		work phone number
zipcode	varchar(60)	Patient 5- or 9-digit zip code
